

CATCHBOX FOR EDUCATION

Engage your students with Catchbox, the world's first throwable microphone for classroom participation

Increases Student Engagement

Easy to throw to anyone at a moment's notice, the Catchbox ensures all students are actively thinking about the learning material. This not only increases knowledge retention,

but also develops critical thinking by encouraging students to formulate answers and arguments in case the box happens to land on them.

Develops Communication Skills

Easy to throw even to the back of the class. Catchbox ensures everyone gets to participate in the discussion and simultaneously develop their critical thinking and communication skills.

By amplifying sound and acting as a speaking totem quiet students are also given a voice that isn't drowned out by louder participants.

Makes Learning Fun & Active

The playful nature of the colourful Catchbox easily breaks the ice and lightens the mood in class, making attendance fun as opposed to compulsory. The act of throwing and

catching also adds physical activity to learning, creating a desired change of pace from just sitting.
