Meet the Transmitters

The wireless transmitters detect the sound, alert you to fire or if pressed, send a signal to your choice of receivers.

Visit DOOR TRANSMITTER

Detects the sound of your doorbell ringing and alerts you via a receiver

The Visit Door Transmitter helps you to notice when the doorbell rings, no matter if you are several rooms away. It signals the Visit receiver that notifies you with your own choice of flashes, sounds and vibrations. This way you will always know when the guests arrive.

**NOTE: the Bellman Door Transmitter requires at least ONE Bellman Visit Receiver to operate.*

Visit PUSH BUTTON DOOR TRANSMITTER

The Bellman™ Visit Push Button Transmitter is part of the Visit smart home system that helps you to keep tabs on your home. It works as a wireless doorbell and tells you when guests are at the door, so you can keep track of the comings and goings in your home. When pressed, it will send a signal to the Visit Receivers that notifies you with your own choice of flashes, sounds and vibrations.

Visit Receivers to notify you are the Visit Flash, Visit Pager or the Visit Portable Receiver.

The push button transmitter can also be used as a personal alarm to notify a relative or caregiver that you need assistance.

Visit TELEPHONE TRANSMITTER

Detects the sound of your phone ringing and alerts you via Bellman™ Visit Receiver(s)

The Bellman™ Visit Telephone Transmitter is the part of the Bellman™ Visit system that alerts you to incoming telephone calls.

The installation is extremely easy, simply plug the Telephone transmitter into the telephone socket. When activated by an incoming telephone call, the Telephone transmitter sends a radio signal to the Bellman™ Visit receiver(s) for alerting. For an audible amplified sound use the Bellman™ Visit Telephone Transmitter together with the Bellman™ Visit Portable Receiver.

When disconnecting the telephone cord the Telephone transmitter (“Multipurpose transmitter”) can also be used as a Push-button transmitter or pager.

**NOTE: the Bellman™ Visit Telephone Transmitter requires at least one Bellman™ Visit Receiver to operate.*

Visit SMOKE DETECTOR

Detects smoke and alerts you via a receiver(s)

The Bellman Visit Smoke Alarm is a photoelectric (optical) smoke alarm that includes a 9V battery. It can be used in conjunction with any of the Bellman Visit receivers which will, if within range, detect smoke and smoldering fire at an early stage. Once activated by smoke it sends a radio signal to the Bellman Visit receivers for clear alerting. The Alarm has a low battery alert to indicate when batteries need replacement. It is mounted on the ceiling, just like ordinary smoke alarms.

**NOTE: the Bellman Visit Smoke Alarm requires at least ONE Bellman Visit receiver to operate. The receivers that you can choose to be alerted by are either the Bellman Flash, Pager or Visit Alarm Clock, which can be purchased separately or as a package.*

Visit BABY CRY TRANSMITTER

The Bellman Visit Baby Cry Transmitter alerts you to your baby crying. It is wireless and extremely easy to use, simply place it upright near the baby. When the Baby Cry transmitter is activated by crying it sends a radio signal to the Bellman Visit receiver to alert you.

The sensitivity of the Baby Cry transmitter can be adjusted to best suit your needs.

**NOTE: the Bellman Visit Baby Cry Transmitter requires at least one Bellman Visit Receiver to operate.*

It is recommended to use the Bellman Visit Pager during the day and the Bellman Visit Bedshaker with the Bellman Visit Pager Charger in the evening.
