

HOME & SAFETY *comfort*

On the Telephone or Mobile

Clarity of sound and ease of use, keeping in touch & communicating with family & friends has never been so easy.

Whether you or your loved one is hard of hearing, or works in a noisy environment, our amplified phones are ideal.

Our telephones consist of features such as extra loud power boosted ringer, tone control, super bright flashing ring indicator, big button high contrast keypad, 12 one touch memories, easy grip handset, answering machine and compatibility for T switch users.

TELEPHONE AMPLIFIED ringer

BELLMAN™ RINGER will alert you with a powerful sound signal and a clear light indication when the telephone rings. You can easily adjust the ring volume, tone and sound pattern to suit your individual needs. It simply plugs into your telephone line.

ARTONE BLUETOOTH LOOPSET™ for T-SWITCH users

For calls and music listening from your mobile phone. The loopset will connect to your phone via bluetooth, amplifying the signal, and send it to your hearing aid.

MOBILE PHONE sensor

Modern technology has redefined the way we communicate. Nowadays we use mobile phones and tablets to keep in touch with family and friends. Through e-mail and social media, like Facebook, we can stay updated on recent events, and we can even talk face-to-face over long distances.

The Mobile phone sensor alerts you to incoming calls or messages on your smart phone or tablet, even if you are in another room or if you have trouble hearing the ring signal.

This product can only be used in conjunction with the Bellman PRO or VISIT alarm clock, or connected to the Bellman Visit Alerting system using the Telephone transmitter or Flash. All of these can be purchased as packages, depending on your requirements.

The mobile phone sensor is activated when a mobile phone or tablet screen lights up, for example from an incoming call or message. Place it on top of the mobile device and connect it to the Visit system to be alerted with sound, flashes or vibrations when someone is trying to reach you.

AMPLIFIED CORDLESS TELEPHONE with LARGE BUTTONS and ANSWERING MACHINE

The SSE45 & SSE45+1 phones are equipped with an Integrated Digital Answering Machine with Slow Playback, ensuring you never miss that important call. The XDECT Digital Cordless Phones offer Extended Digital Coverage by utilising a Diversity Antenna System for Optimal Reception and Clarity by mitigating multi-path errors. It also features a High Gain Antenna for greater range and to eliminate drop out areas in your home. The Large Screen Buttons are ideal for Hearing Loss / Elderly people, Visual Problems / Low Vision, Noisy homes, workplaces or warehouse.

The Handset has a built-in T-Coil (Hearing Aid Compatible) enabling you to hear the caller directly to your hearing aids, if you have the t-switch feature. This new SSE Series increases extra loud volume to 50dB. The 3 Picture keys with speed dial makes it easy to recognise important contacts.

This system is also suited to Quiet Do Not Disturb Areas (e.g. Nursing Homes) use the Visual Incoming Call Indicator. The Do Not Disturb Function allows you to mute the ringer and is ideal for those times that you don't want to be disturbed. Also available in Double Handset.
